

Follow-up Call — Banyan Outdoor

TUE • JUNE 9, 2026 • 11:00-11:45 AM PT • GOOGLE MEET •
SECOND CALL

What it already knows: the first call, the emails since, who is in the room today, the ideas Banyan got excited about, and every open thread between you — pulled forward from the record, not a web search.

Where it stands

MAY 28 • 35 MIN

First call with the two co-founders. You framed Command Room as the system that **remembers the business so they do not have to**. They leaned in on AI that **sits in on calls** and on getting more leverage out of a lean team. You agreed to bring their technical lead into the next one.

MAY 30

You sent the overview and three short scenarios tied to their world. **Done.**

JUNE 4

They replied to confirm today and asked one question up front: **does this replace the AI assistant they already pay for, or work next to it.**

TODAY

Technical follow-up — their lead joins to settle how Command Room fits with the tool they already run.

The room

A small, warm room — and this time Command Room walks in already knowing them.

R. BUYER
CO-FOUNDER

Runs the brand day to day and holds the budget. Sold on the idea since the first call, but cautious: the AI assistant they bought last year **never earned its keep**. Today he is mostly listening while you and his technical lead align. **Wants:** proof this will not become one more subscription that sits idle.

K. NEW · TECHNICAL
TECHNICAL LEAD

Set up and maintains their current AI assistant, so he is the key voice on how Command Room fits. **Win his buy-in and the path is clear.** New to the thread: confirm his scope, and settle whether Command Room sits alongside what he built or replaces it. Treat him as a peer, not an obstacle — bring him in as the architect.

M. CONTEXT · MAY JOIN
CO-FOUNDER · R.'S PARTNER

On the first call, and the one who raised the sharpest ideas. Owns product and the brand voice; less interested in the plumbing. **If she is on:** she is the one who got animated about the call-listening intelligence and about coordinating outreach — those threads are hers.

Their own ideas

Straight from the May 28 call — their words, not a pitch. All of it is in scope.

AI sitting in on their calls. Capturing supplier and retail conversations and surfacing what matters, so nothing important slips between two busy founders.

This is what lit them up — start here.

One place that remembers the business. M.'s framing on the call: they are tired of "the answer living in someone's head or buried in a thread." The compounding value, not a one-off lookup.

Keeping their wholesale follow-ups from going cold. Buyer conversations from trade shows that stall because no one circles back in time. They want the threads tracked and nudged.

Outdoor
gear

consumer
brand

A founder-led, ~14-person outdoor-gear brand growing into wholesale while running lean. The appetite for AI is there; the execution help is not. They already bought into the *idea* — they just never got it off the sideline.

Today's job

Do not let it become another tool that sits idle. They already paid for an AI assistant that returned nothing — that is the fear to beat, and the reason this call matters. Your edge is not just the software; it is the guided, pointed-at-their-workflow engagement that actually gets used. Say it plainly.

Settle: sit alongside or replace. Does Command Room co-exist with their current assistant, or replace it. That is why K. is here — get to a clear answer, with him, in

the room.

Aligning with K. is the unlock; R. is watching to see it click.

Show it on their data. Bring a small, live example against one of their own calls. They have heard the pitch — this is the call where they need to see it work on their stuff.

Reassure on lock-in. The brain folder is portable and theirs — the line that landed last time. Repeat it.

Flags before you join

New face. K. is new to the thread — confirm his role and how he wants to work alongside the existing setup before you architect anything.

Show, do not tell. They have already heard what it can do. The job today is to make it real on something of theirs — keep it concrete.
